

Individual Website Report from the European Animal Research Association

Institution: Sociedad Española para las Ciencias de Animales del Laboratorio (SECAL)

Date surveyed: 16/01/2019

Website homepage URL: <https://secal.es/>

Categories	Criteria	Y/N
1. Statement	'Does the website carry a statement indicating a contribution to animal research?'	Y
2. More information	'Is it possible from the website to identify an animal <i>species</i> used in research, or the type of research taking place?'	Y
3. Prominence	'Can animal research be considered a <i>prominent</i> part of the website?' This could be measured by having a statement (q.v.) that is easily accessible from the Home Page, a large <i>volume</i> of animal research-related material or, in the case of some sites, the topic made prominent by the nature of the site's publishers.	Y
4. Case studies	'Does the site host <i>case studies</i> of animal research?' For the purposes of the survey, a case study can include refereed papers, online press releases, or commercial copy describing the development/benefits of a type of medication.	Y
5. Images	'Does the website contain images or videos pertaining to animal research?' While we strongly encourage original images and video generated through animal research – photos, filmed footage, medical imaging etc – for the initial 2018 survey we have also accepted animal clipart, stock photography etc.	Y
6. Extensive information	This can vary from an FAQ section, to extensive linking out to relevant external webpages, to public lectures; the common denominator is when effort is made to engage the public on the question of animal research.	Y
SUMMARY: 6/6	Six out of six criteria met
